

# Introducing The New Bommer LB4300 Series Lube Bearing Spring Hinge.

**PATENT  
APPROVED  
OCT. 8 2002**

The Lube Bearing design eliminates metal-to-metal contact, which reduces friction and provides a smoother operation.

Cut-away shown for effect only.

New Self-Lubricating Bearings provide an operating surface that requires no additional lubrication during the life of the hinge.

Combined with the new Lube Bearings, the one-piece spring cartridge assembly with a freely moveable spring provides 22% better performance.

C U/L US Listed Grade 1 and BHMA/ANSI A156.17 Grade 1 Certified for 1,000,000 cycles.

Available in Steel .096 gauge material for standard residential applications, and Steel or Stainless Steel in .130 and .134 gauge material for commercial applications.

Available in 20 architectural finishes, more than 70 hole patterns with optional square, 1/4" radius or 5/8" radius corners.

The Bommer Industries, Inc. shield represents 125 years of quality. As the leader in the spring hinge industry, we continually explore new technologies to make the best even better. The newly re-engineered, ~~patent pending~~, LB4300 Series is made in the USA and is available in 150 plus Quick-Ship items.

*Patent Approved*
